Profile Summary

Cloud Automation Developer with 3+ years of experience delivering scalable solutions based on Dynamics 365 & Azure for large-scale clients. Certified in Microsoft and Google Cloud technologies with proven expertise in API integrations, Cloud Automation & DevOps, with a strong focus on reliability and maintainability. Exposure to building AI-driven early stage RAG applications using Azure OpenAI and LLMs, improving business process efficiency.

Technical Skills

AI & Automation: Azure OpenAI Service, GitHub Copilot, LLM APIs, RAG Applications, Prompt Engineering.
Cloud Stack: Microsoft Azure (Functions, Logic Apps, Storage, Service Bus), Power Platform (Power Apps, Power Automate, Power Pages), Dynamics 365 CRM Technical.
DevOps & Scripting: Azure DevOps (CI/CD, YAML, Bicep), PowerShell.
Back-end Development: C#/.NET 8+, Python, REST APIs, Webhooks, SQL Server.
Front-end Development: JavaScript, React.js, TypeScript.
Tools: Visual Studio, Git, Postman, Swagger, Bruno, XRM Toolbox, Fiddler, Visio, Draw.io

Experience

Accenture

Hyderabad, Telangana

Advanced App Engineering Senior Analyst

June 2025 – Present

- Built AI-driven RAG applications for data insights on Azure, leveraging ADA embedding models, Azure OpenAI, vector based retrieval, and LLM APIs to automate analysis and generate actionable outputs.
- Identified and implemented 10+ automation opportunities across enterprise workflows, improving process efficiency and reducing repetitive manual tasks by 30%.
- Built and optimized API integrations between Dynamics 365 and external systems through Azure Services like Functions, handling 1000+ daily transactions.
- Developed AI-driven agent-based application (Guardian AI) for real-time decision and emotional support.
- Led migration of 16+ Logic Apps from consumption to standard plan, mitigating ISE deprecation risks and improving system reliability by 45%. Followed it with moving required workflows to Azure Functions, ensuring 30% cost optimization.
- Automated deployments for 5+ projects using Azure DevOps YAML pipelines and Bicep (IaC), reducing release time by 30% and improving deployment consistency.
- Promoted to a senior role within 2.5 years of experience for driving high-impact deliverables, consistently exceeding performance expectations and client appreciation.

Advanced App Engineering Analyst

Dec 2022 – June 2025

- Delivered 50+ user stories covering API Management, Form Customizations, Plugin Creation, and Business Rules, improving app functionality and system scalability.
- Built and customized a Power Virtual Agents chat-bot, increasing user engagement by 40% through real-time responses.
- Implemented optimized API queries with filtering, improving data retrieval efficiency by 25% for complex entity relationships.
- Worked on enhancing Power Pages, resolving 15+ critical issues and improving user experience and client satisfaction.
- Enhanced Model-Driven App forms and Canvas App UI, reducing user navigation time and improving usability.

Achievements & Certifications

- Top Certifications: AI - 900, AZ - 204, AZ - 104, AZ - 900, MB - 500, MB - 300, PL - 400, GCP - ACE.
- Client Excellence Award x2, Team Category Excellence Award.
- Pre-finalist in A.S.C.E.N.D. Gen AI Hack-a-thon, Accenture: Gen AI Mastermind Finalist.

Education

Vellore Institute of Technology

2018 - 2022

Bachelor of Technology

Vellore, TN

- Awards: 2nd place in Mathathon for developing an automated targeting system (out of 120+ teams)
- Participated and arranged MUNs and Transformative events as a member of IET chapter.
